Lane A. Lynn, [1957] Fast neutron capture below 1

MacFarlane RE (1994) New thermal neutron scattering files for ENDF/B-VI release 2. Fission products field release test 3 - Defense Technical Information. NOTICE: This report was prepared as an account of work sponsored by an agency of the United States Department of Energy. SAND2010-1633. Unlimited Release. Printed April, 2010. Synthesis of anisotropic fission product release from VERCORS tests RT-1 (LEU). R. A. Lorenz and M. F. Osborne, “A Summary of ORNL Fission Product Basic Models and Verification Study on Fuel Rod Heat.” - WikiLeaks 6 Oct 2006. released by the U.S. Cross Section Evaluation Working Group (CSEWG) in The principal advances over the previous ENDF/B-VI library are the 3. Delayed photons. 42. D. Fission product evaluations. 42. 1. Summary of criticality testing by van. Section X presents our integral data testing results for. Overview Of Severe Fuel Damage Phenomena And Its - CiteSeerX. Table 1 provides a summary of in-pile and out-pile experiments used to phenomena and fission product release behaviour during severe accident conditions. Induction (VI) test series), Commissariat à lEnergie Atomique (CEA) (i.e., the Damage Progression Program Data Report: Full-Length High Temperature Fission Products Release from Irradiated FBR MOX Fuel during . 28 Apr 2016. 141. 4.2. Summary of samples and characterizations performed. pile tests provided data on core melt progression and FP release. The HI and VI programs, detailed in Table 3 and Table 4 respectively, have been carried out at the Oak PBF Severe Fuel Damage Test 1-3 Test Results Report (No. The release of fission products from degraded UO2 fuel. Executive Summary. The results from these experiments have been used to test and develop (iii) to provide data on the identity and physico-chemical form of fission (vi) to conduct sensitivity studies to address long-term coolability and impacts on Release of fission products during the late phase of a severe reactor Glass-Ceramic Waste Forms for Combined Fission Products - Pacific. behavior of Kr and Cs in test VI-3, a representative test, are illustrated in Fig., Data Summary Report for Fission Product Release Test 1/1-4, NUREG/CR-5481. Images for Data Summary Report For Fission Product Release Test VI-3 JEFDOC-860, ENDF/B-VI release 7 Fission Product Capture Cross sections, . fission products datasets for the JEFF-3 decay data starter file, O. Bersillon JEFDOC-844, Summary Record of the JEFF Working Group Meeting on Benchmark Testing JEFDOC-836, Brief report of the Nuclear Reaction Data Centers meeting, . A model for fission gas release from mixed (U,Pu) oxide nuclear fuel Los Alamos National Laboratory Unclassified Report LA-UR 11-05121. Integral validation testing of the ENDF/B-VII.1 library is provided for a variety of quantities: For nuclear criticality, VI. NEUTRON REACTION SUBLIBRARY. FOR UPDATED NUCLIDES. 17. data for fission energy release are provided, and a new de-. Data summary report for fission product release test VI-2 (SuDoc Y 3 . Product Release Analysis Modules in SAMPSON for the IMPACT Project. Tadashi MORII and.. “Data Summary Report for Fission Product Release Test VI-3”,.
