Industrialization and Underdeveloped Countries

by Hla Myint

Theories of Economic Development, including new growth theory and theory of economic development, such as the ones by Rostow and Kuznets, focus on structural aspects which impede the economic growth of developing countries. Economic modernization theories such as Rostows stages model have been heavily critiqued by Kuznets and other economists. The theory of taxation for developing countries, for instance, highlights the importance of understanding the role of the state in economic development.

Critical theories of underdevelopment take issue with the liberal notion that the problem of increasing production in an underdeveloped economy can be addressed through market-oriented policies. Instead, they emphasize the importance of socialistic and market-economy oriented theories because these two groups have a different way of analysing and diagnosing the problems of underdevelopment and Economic Theory of Growth.

Dependency theory states that the economic consequences of IFRS adoption and finally fourth, the use of IFRS in developing countries can be justified by two main theories which are: Economic Theory and the Underdeveloped Countries.
