Industrial Robotics Market Perspectives and Forecasts 2018 - 2023, a new report by Allied Market Research, predicts a steady growth in the global industrial robotics market. The report states that the market is expected to reach USD 70,715 million by 2023, with a CAGR of 7.0% from 2016 to 2023.

The report categorizes the industrial robotics market into type, industry, and application. By type, the market is segmented into Cartesian robots, SCARA robots, Palletizing robots, Cobot robots, Delta robots, Parallel robots, and others. The market is further segmented by industry into automotive, electronics, food & beverage, packaging, healthcare, and others.

The report highlights that the automotive industry is the largest consumer of industrial robots, accounting for about 30% of the market. The electronics and packaging industries follow, each accounting for about 20% of the market. The healthcare industry is also a significant consumer of industrial robots, accounting for about 15% of the market.

The report also identifies the key drivers of the industrial robotics market, including increasing labor costs, automation trends, and advancements in technology. It predicts that the market will continue to grow steadily, driven by these factors.

The report includes a comprehensive analysis of the market, including a SWOT analysis and a Porter's Five Forces analysis. It also includes a regional analysis of the market, with a focus on the top ten countries in terms of market size.

The report provides a detailed forecast of the market, with predictions for each type, industry, and application segment. It also includes a detailed analysis of the market by region, with forecasts for North America, Europe, Asia-Pacific, and the Rest of the World.

The report is a valuable resource for companies looking to enter or expand in the industrial robotics market, providing a comprehensive understanding of the market's current state and future trends.
As the robotics industry grows, so too do the number of research reports from Global industrial robotics rental market, July 2017, 92 pages.
