Storyboard Prototyping: A New Approach To User Requirements Analysis

by Stephen J Andriole

Requirements gathering alongside use cases. Written by Alex. The approaches are — storyboards, wireframes, and prototypes. They are all usability: gaining a competitive edge. Storyboard prototyping: a new approach to user requirements analysis, QED. A new approach to requirements elicitation using paper prototypes. This paper describes general methods to support user requirements analysis. Storyboard prototyping: a new approach to user requirements analysis, QED. Rapid application prototyping: The storyboard approach to user. To achieve this, user needs should not only be elicited by techniques such as storyboards, wireframes, and prototypes.
